

# MANAGING MEDICAL AND OBSTETRIC EMERGENCIES AND TRAUMA (mMOET)

A high level and structured approach to managing the care of pregnant women with medical emergencies and/or trauma

## mMOET 4e...what does it give you?

- Rigorous, challenging, advanced simulations following a structured approach.
- Teaching leadership skills required to manage the emergency care of pregnant women.
- Highlights the human factors necessary to respond appropriately.
- Practical experiences to ensure life-saving techniques are practised and assessed in a safe environment.
- Embedded skills within simulations to allow real-time contextualised learning.

## AT A GLANCE

Updated blended learning package includes:

updated and restructured e-modules

practical face-to-face training with specialty faculty
